SAFETY INSTRUCTIONS FOR USAGE OF GASEOUS OXYGEN CYLINDERS FOR MEDICAL USE ON AEGEAN AIRLINES FLIGHTS

Aegean Airlines allow the passenger above, the carriage and usage of a small gaseous oxygen cylinder of **not more than 5kgs capacity on Aegean flights.**

The passenger must follow the instructions below and confirm notice and acceptance by signature:

- The passenger must ensure that the valves are properly secured.
- The oxygen cylinder must be stowed in a solid case under the front seat during the flight and if possible also during the usage.
- The case must not exceed a maximum size of 55x40x23 cm and a weight of 8kg.
- No usage of the oxygen cylinder is allowed in the lavatory, and during turbulence.
- The passenger must follow the instructions of the Cabin Staff.
- This certificate is signed and presented by the passenger at Check in along with the ticket.
